

Adapter BT

Bluetooth connecting unit from the UNI System 8

The Adapter BT is another practical possibility for combining your mobile phone with a Bury hands-free car kit from the UNI System 8. The adapter can be used as a cradle in the base unit of the hands-free car kit. Access to the voice-dial functions of your mobile phone* is also possible. The voice-dial commands can be activated via the Adapter BT with active Bluetooth connection. You can telephone without touching your mobile phone.

Advantages

- Connection set with Bluetooth interface for UNI System 8 hands-free car kits
- Bluetooth connection* with up to four different mobile phones
- Adapter instead of mobile phone cradle - thanks to Bluetooth reception*,
- You can leave your mobile phone in your bag or pocket
- No mobile phone cradle required
- Supports mobile phone's voice-dial function*
- Four light diodes for status display and for better operation

**if the mobile phone supports this function*
