

„Software connects people  
with electronics!“

Marcin Gladysz | software developer

To strengthen the development team at the Löhne location (NRW), we are looking at the earliest possible starting date for a

## Senior Software Engineer (m/f/d)

### What's waiting for you

- Concept development and software creation for Car-Infotainment/Multimedia/hands-free sets
- C/C++ programming
- Supervision of projects from the concept stage to production launch
- Drafting functional and technical specifications
- Development of the software side of concepts, specifications and architecture, software design and implementation and execution of software tests on the levels of module, integration and system

### What makes us different

**Future-proof family business** – with flat hierarchies and a corporate culture based on partnership

**Comprehensive and sustainable training** – collegially supported and across departments according to a structured plan

**Flexible working time models** – for a balanced and individual work-life balance

**Professional and individual further education** – for continuous, personal and professional development

**Team-oriented thinking and action** – supported by regular employee events

**First housing option** – in own staff apartments directly at the site

### What you bring with you

- Degree in electronics/information technology/informatics or similar
- Ideal candidate should have several years' experience in one of the areas: USB, AUTOSAR, Wireless-WLAN technologies, as well as Bluetooth, CAN and LIN electrical wiring in cars, updating and integration of Linux and Android operation systems on various hardware platforms, implementation and development of audio signal processing algorithms for DSP and microcontrollers
- Analytical and creative skills, task-oriented approach, team working skills
- Very good knowledge of German and English, written and spoken

Please submit your complete application stating the earliest possible starting date and your desired salary (preferably by e-mail) to: BURY GmbH & Co. KG | HR Department | Robert-Koch-Str. 1-7 | 32584 Löhne | [personal@bury.com](mailto:personal@bury.com)

BURY is a global automotive supplier offering original equipment. The range of services provided starts with the standard component and ends with development of individual systems. Advanced manufacturing technology at BURY is adjusted to the needs and expectations of customers. BURY has a reputation of a modern and flexible company across Europe and North America: research, design, development, testing and production – all from one source. The company operates extremely efficiently and expands on a global scale.
