

BURY

letter of recommendation

Fraport AG

Dear Sirs,

As a ground transportation services provider, Fraport AG, would like to thank BURY, via this letter, for the professional and fruitful cooperation.

Fraport AG is a listed operation unit of Frankfurt Airport. In 2018 Fraport company handled at the Frankfurt airport close to 69,5 million passengers and goods to the total amount of 2,21 million tons. The airport operates on average 1.300 take-offs and landings.

In order to equip our ground vehicles with an internal communication system, we contacted BURY company for the first time in 2018 and expressed our interest in CP 1000 CarPhone system. In order to ensure everyday operation at the airport landing grounds, first of all a stable and reliable equipment is needed. We decided to select the CarPhone device, due to its sturdy design and large keypad, enabling easy and comfortable handling, also when wearing gloves. So far, we have sourced 500 units of this device for installation in our ground vehicles. We are satisfied with the functionality and quality of the CarPhone device and we would like to recommend it to other customers. We can call BURY a truly partner company, providing efficient service, as well as technical support.

That is why we would like to continue our cooperation with BURY company in the future.

Kind regards,

Maximilian Rassmann
Logistics and Project Management Department
Ground Transportation Services – BVD-SL
Fraport AG

BURY is a global automotive supplier offering original equipment. The range of services provided starts with the standard component and ends with development of individual systems. Advanced manufacturing technology at BURY is adjusted to the needs and expectations of customers. BURY has a reputation of a modern and flexible company across Europe and North America: research, design, development, testing and production – all from one source. The company operates extremely efficiently and expands on a global scale.
