

ENVIRONMENTAL POLICY

of BURY TLAXCALA Company

Operations taken by the company as a result of adopted development strategy are based on a care for the environment. Environmental Policy implemented at BURY Company is established according to the purpose of organization and its context, including its nature and scale of the environmental impacts of its activities, products and services.

Top Management Declaration

Taking into consideration the context of the organization and the needs and expectations of interested parties, we undertake to:

- monitor and meet the legal requirements, and requirements of clients, interested parties and also environmental protection internal requirements,
- identify risk and opportunities related to environmental aspects and manage the environmental aspects,
- protect the environment, including preventing pollution,
- integrate the Environmental Management System with organization business processes,
- improve and constantly improve EMS, aiming at improvement of the environmental effects of activity,
- assign and communicate the responsibility and authority to the persons performing important roles in the organization,
- design products in such a way to minimize their impact on the environment during production, use and disposal,
- implement environmental goals related to restriction of pollution emission to the atmosphere, protect the soil against negative impact of the wastes arising at the Company's premises, rationally use the materials, energy and water and prevent emergencies.
- actively shape and maintain the highest level of ecological awareness,

The Top Management ensures the application and compliance with the requirements of EMS described in the Environmental Book and related documents and provides also appropriate resources and means to implement this Environmental Policy.
