Electronic box can be concealed behind radio or in glove box
— device invisible in the car

¹The scope of the functions may vary according to mobile phone, network provider and software version.
²AUX cable or CAR MP3/CD Adapter needed (accessory)

Invisible but clearly audible!

CC 9045

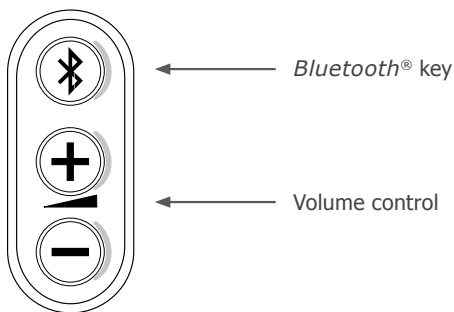

in detail

This hands-free car kit isn't visible, as the electronic box, for instance, is installed behind the radio. It can certainly make itself heard though! Thanks to the *Bluetooth*® A2DP protocol, music files which are saved on your mobile phone can be played back in stereo through the speakers in your vehicle. It also goes without saying that the sound quality with telephone calls is superb. This is made possible by the built-in DSP processor that filters out almost all of the driving noise.

How you can upgrade the *Bluetooth*® CC 9045 hands-free car kit:

Functions of the remote control keys
